Stock Market Simulator Game

By - Sanjana Bashya

Problem Statement
Navigating the Difficulties of Stock Market Education

Fear of Financial Risk

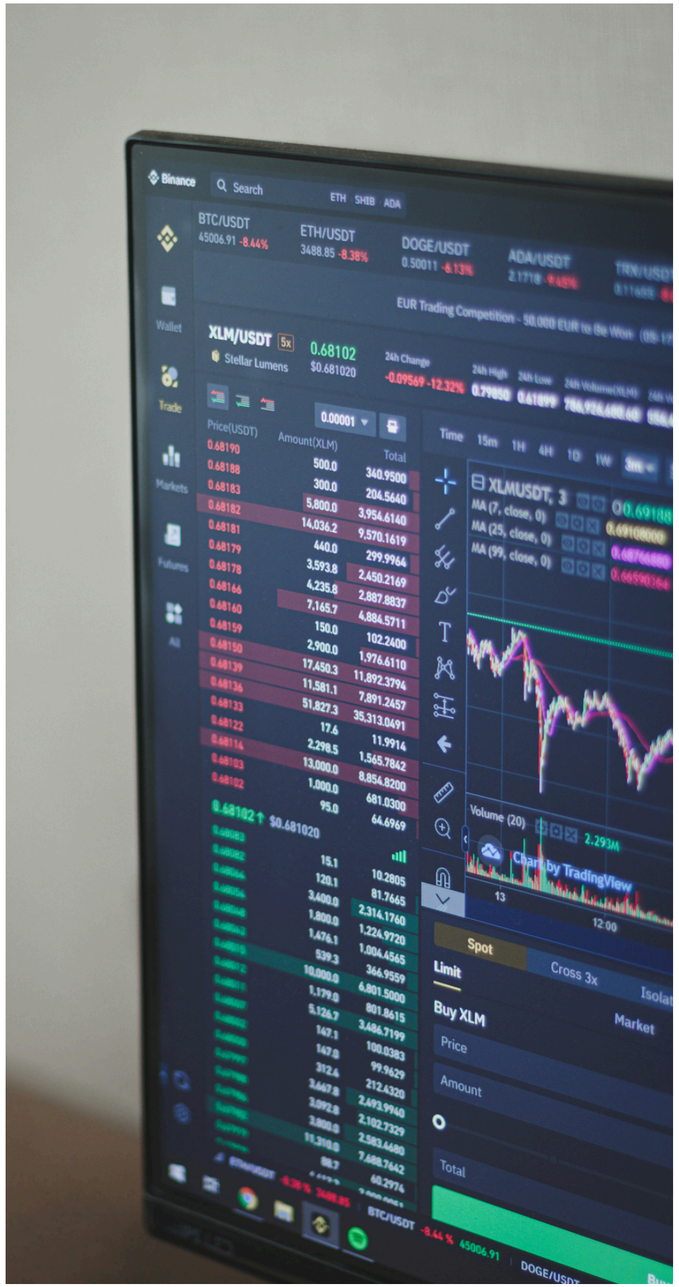
Many people want to learn the fundamentals of the stock market, but are reluctant to do so due to the financial risk that is associated with the actual stock market trading sites. The risk of losing money is a big factor that prevents people from investing.

Complexity of Real Platforms

The conventional trading platforms are complex, loaded with complex words, high-end features, and a high learning curve. It is difficult to learn and practice the trading process without sufficient knowledge.

Need for Risk-Free Learning

There are a number of people who are willing to learn about the stock market fundamentals but are discouraged by the financial risks involved in the actual stock market trading platforms. The risk of losing money is a major entry barrier for aspiring stock market investors.

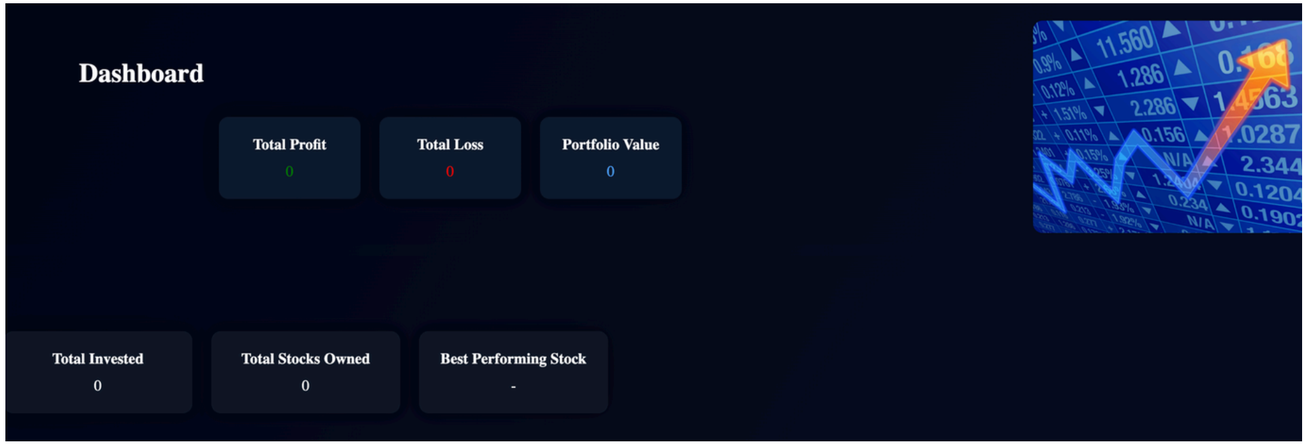


Solution

Empowering Future Investors with a Virtual Trading Experience

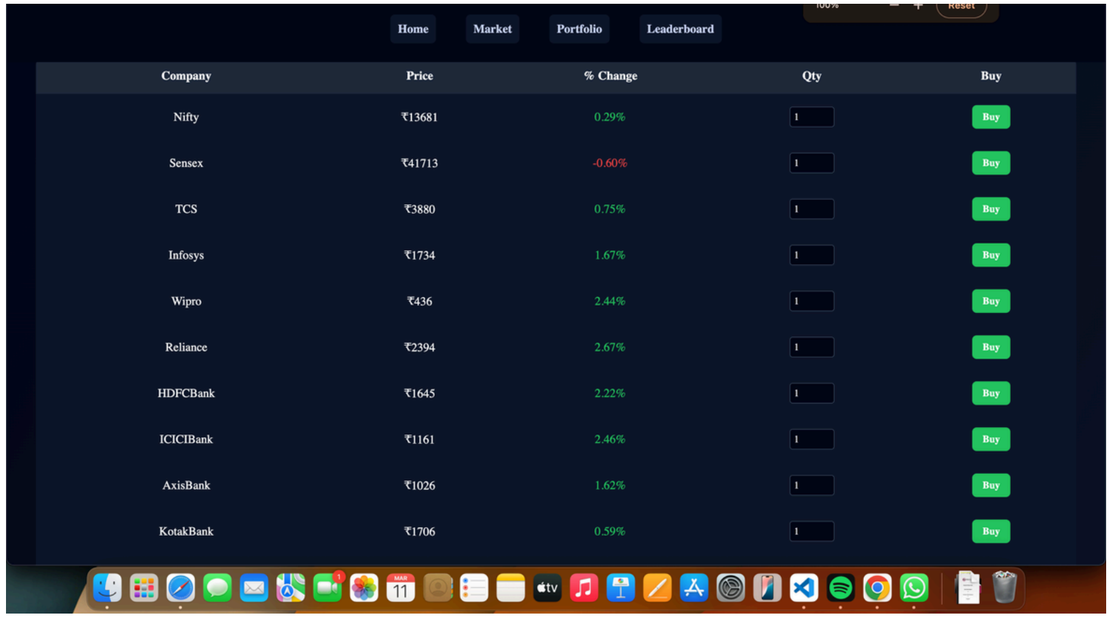
Competitive leaderboard system that boosts engagement and encourages healthy competition among users

Interactive gameplay that allows users to explore real-world market behaviour and basic investment strategies

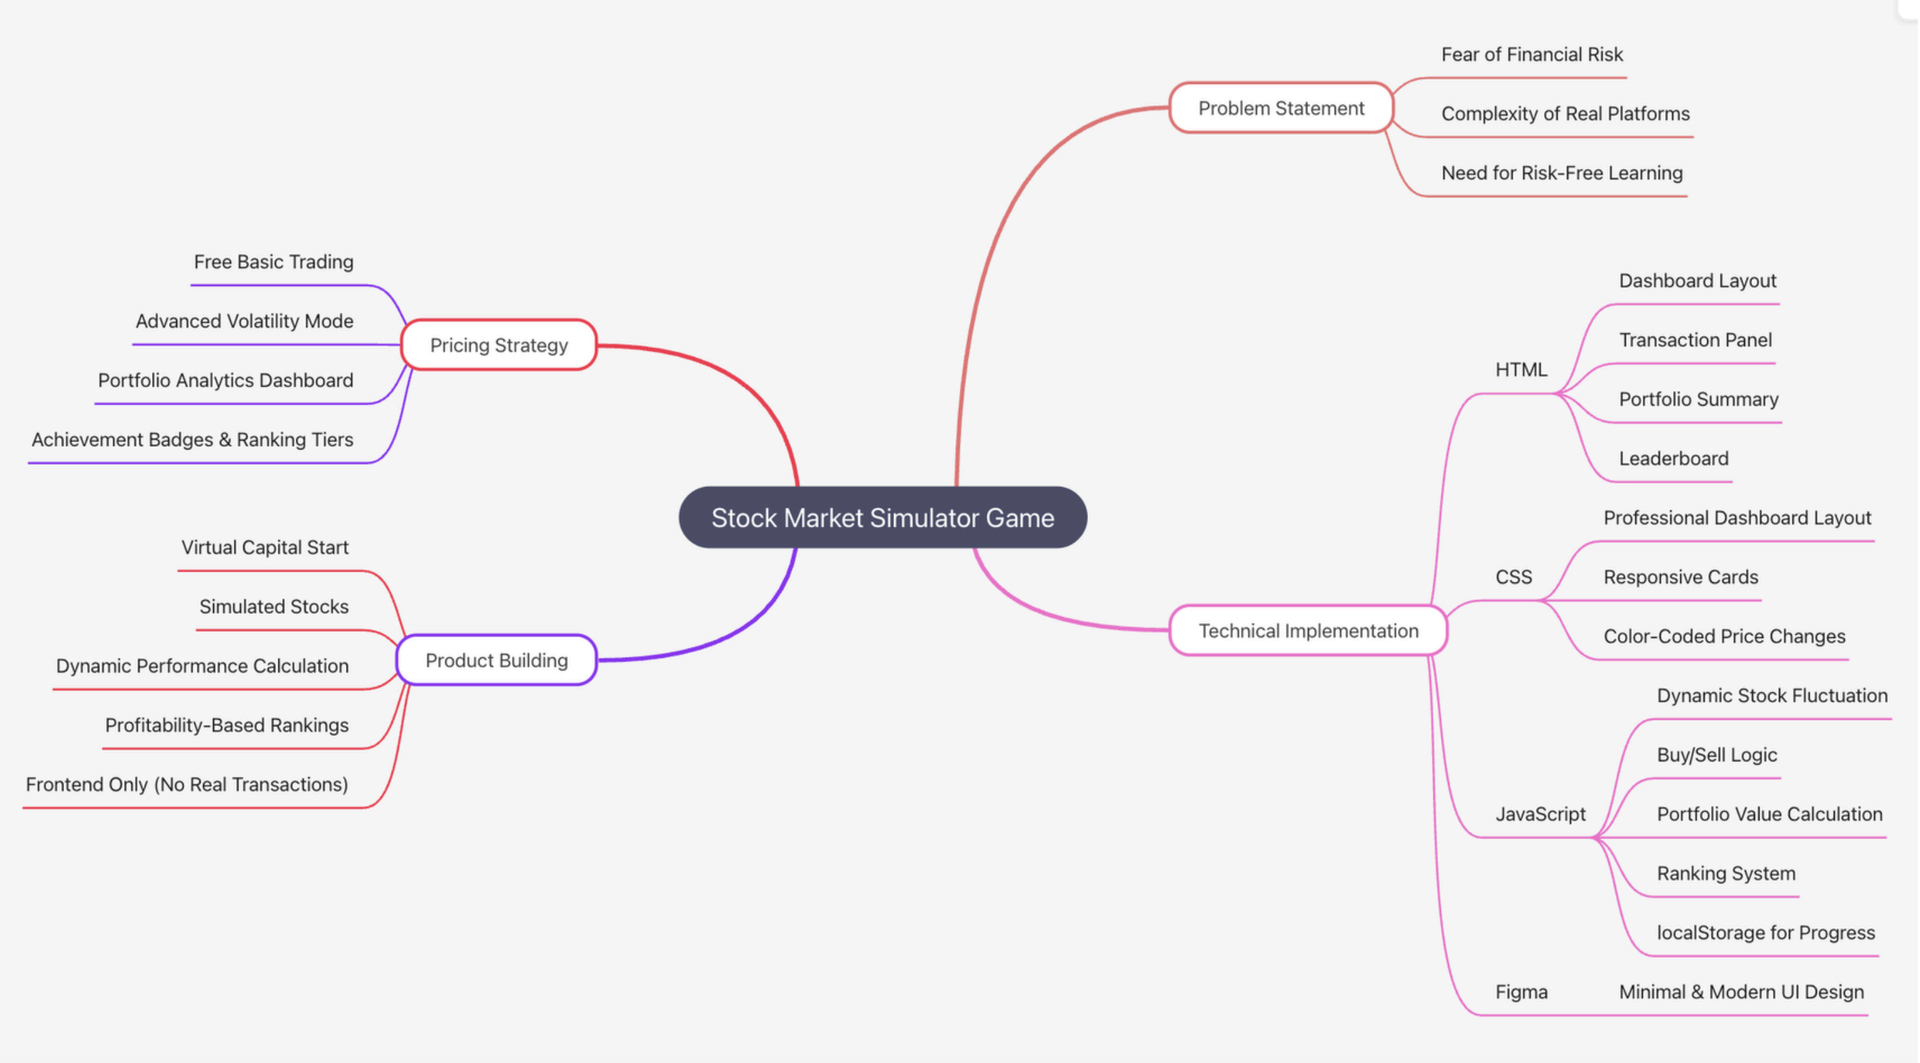


Real-time portfolio tracking to monitor investments, profits, losses, and overall growth with virtual money

Dynamic market simulation that reflects realistic price movements and market fluctuations



Stock Market Simulator - Working Method



Conclusion

The Stock Market Simulator Game provides a safe and interactive platform for beginners to learn stock market trading without financial risk. Using HTML, CSS, and JavaScript, it simulates stock price movements, buying and selling of shares, and portfolio management, helping users understand the fundamentals of investing in a simple and practical way.
